Profile

 **Bachelor in Computer Engineering**
Canakkale Onsekiz Mart University
Turkey 2021-2025

I am a highly skilled **Computer Engineer** with extensive experience in developing and optimizing systems to solve complex **performance, scalability, and technical challenges**. Over the past years, I have designed and implemented robust **backend architectures**, as well as **full-stack applications**, driving efficiency and innovation within organizations. With a deep understanding of both software development and infrastructure, I bridge the gap between engineering teams and business needs, delivering solutions that are scalable, reliable, and secure.

Main Skills

- **Back End Development**
- **Front-End Development**
- **UI/UX Design Principles**
- **Databases**
- Problem-Solving
- Collaboration
- Communication/Adaptability

Tools & Languages

- Django, C#, Python
- Typescript
- React.js
- HTML5, CSS 3, JavaScript
- SQL, (MSSQL, PostgreSQL)
- Git, GitHub
- Docker

Trainings

- Udemy: The Complete Web Developer ZTM
- Udemy: Complete React ZTM

Languages & Extras

- Albanian: Native,
- English: technical, conversational, (B2)
- Turkish: technical, conversational, (C1)

Work Experiences

July - September 2024

Clickservice GmbH

Software Engineer

At **Clickservice GmbH**, I worked as a software engineer, focusing on building robust web applications using **Django** for backend development and **TypeScript** for front-end enhancements. My role involved designing and implementing scalable solutions, optimizing performance, and ensuring seamless integration between different systems.

Side Projects

- <https://e-commerce-v2-black.vercel.app/> – E-Commerce Store. (React, Firebase)
- <https://www.erlindiisaj.com/> – Provides an overview of my expertise and projects
- <https://social-media-app-alpha-three.vercel.app/> – Modern and User-Friendly Interface
- <https://projects-portfolio-drab.vercel.app/> – Mini projects like Weather App, To Do List
